

GET ARTWORKS[®] CLINICAL TO HELP YOU PROVIDE SUPERIOR CARE WHILE INCREASING YOUR EFFICIENCY

*IntegraMed has spent 20 years working with some of the most prestigious fertility centers across the country. We know that a thriving and profitable fertility practice concentrates on a few core competencies – two of those are to **Provide Superior Care** and **Manage the Business**. By installing ARTworks Clinical, IntegraMed practices have been able to better manage patient treatment while streamlining their patient flow processes and maximizing efficiency.*

ARTworks Clinical – Is the most widely used Electronic Medical Record (EMR) in the infertility industry today. Having been field-tested and perfected at IntegraMed practices for over **12 years**, ARTworks Clinical is currently implemented at more than **43 locations** in both mandated and non-mandated states across the country. More than **850** Physicians, Embryologists, Nurses and other clinical staff rely on ARTworks Clinical as the central coordination point for patient care in their respective practices. Now, you can improve your ability to provide superior care and manage practice operations and efficiency with:

- **eMedical Records Management** – *Input, process and manage your patients' medical records on-line with the convenience of anytime/anywhere access and the confidence of knowing your patient data is secure and protected.*
- **Workflow Management** – *Track patient activity electronically, streamline communication within your practice, and document patient care to ensure your guidelines are followed.*
- **Decision Support** – *Enable your clinical staff to access the patient information they need anytime/anywhere to make sound, data-based treatment decisions in real time.*

Project Planning and Practice Preparation – Only IntegraMed has the experience to help you analyze your practice and help you prepare for the implementation of an Electronic Medical Record. We work with you to design and execute an implementation plan that takes into consideration your special needs. With more than **850 users** and over **376,000 medical records** in our system, IntegraMed can help you plan for success, as well as achieve it.

Security and Support – Avoid hidden, ongoing costs to maintain your systems and gain confidence in the availability and security of your EMR. Unlike other EMR offerings, IntegraMed maintains ARTworks for you – you access and manage the data, we maintain the systems. And we are available 24/7 for your questions.

“We knew the right software program could help us with our care coordination growing pains, so we scoured the nation to find it. We quickly realized that ARTworks Clinical is revolutionary.”

- Arthur Sagoskin, MD Shady Grove Fertility Reproductive Science Center

Training and Ongoing Support – Unlike most other EMRs that only come with a software disc and instruction manual, IntegraMed's ARTworks Clinical also has an entire team of experts to guide you. Training occurs in person at our national training center in New York, through distance learning via web-based sessions and on-line tutorials. Our National Users Group convenes regularly to recommend changes, enhancements and provide *real* feedback, so our robust system keeps pace with your needs.

SART Electronic Data Transfer – To save your practice time, money and improve data quality, ARTworks meets all the requirements for electronic transfer of SART statistics. In fact, ARTworks was the first system approved by SART in 2000, and we have successfully transferred this critical information for multiple practices every year since. Your data can be seamlessly incorporated into this proven process; quickly, easily and efficiently.

Optional Interfaces – Improve your ability to provide care and increase your efficiency – via feature-laden modules that can be interfaced to ARTworks Clinical's base functionality, including:

- *DPC Immulite laboratory interface – laboratory orders and results automatically linked with ARTworks.*
- *Ultrasound (DICOM) interface with images and data transfer to patient chart.*
- *Dictation interface with Oracle ti – dictation automatically saved into ARTworks.*
- *ARTworks Financial system interface to link patient treatment events to billing and collection activity.*
- *Pharmacy interface – an electronic interface that allows you to automatically order and change patient RXs from IPSI (IntegraMed Pharmaceuticals Services, Inc.).*
- *Document scanning – paper documents and/or images scanned into patient's EMR chart.*

"It's absolutely critical to our success; it allows for tremendous efficiencies. It's worth its weight in gold."

- Patricia McShane, MD Reproductive Science Center New England

Note: ARTworks Clinical has been designed to share data and work effectively with ARTworks Financial, (our scheduling, billing and collections management system), so your administrative processes and clinical activities can mesh seamlessly. Please see our information sheet on ARTworks Financial to learn more about it.

Do I have to become a Partner in the IntegraMed Network to get ARTworks? No – practices that successfully implement our basic Affiliate products & services can inquire about accessing ARTworks. Please see our information sheet: "Join IntegraMed", or contact IntegraMed for more details.

Want to learn more? Act now – demand for ARTworks Clinical is high – reserve a place on our Implementation calendar before it's too late! For more information regarding the features, benefits and costs of IntegraMed's ARTworks Clinical system and services, call 1.800.458.0044 or email kim.hampton@integramed.com.
